# Keep a Safe and Clean Facility

Paper solutions dedicated to the food industry with detectable coloring and designs that offer minimal contact.

## Features

- Paper suitable for food contact.
- Blue paper that is easily detectable, ensuring that if the paper is lost in production, it can be quickly recovered.
- Sheets folded for one-at-a-time dispensing. You only touch the sheet you use, which helps minimize the risks of cross-contamination.
- Visible paper level indicator in the dispensers, so you may easily see the paper level left without opening it.

| Item number | Description                                                                                                                                                                        | Pack/pcs. | Pcs./carton | Carton/pallet |
