

Foodservice

Your reliable partner for foodservice solutions

ABENA is a family-owned Danish manufacturer and wholesaler established in 1953, with more than 2,000 employees, operating in +90 markets worldwide.

Over the years, we have built a strong, trusted network of suppliers, allowing us to offer products of high quality with a short lead time and unmatched supply consistency. We emphasize quality – with comprehensive documentation, traceability along the supply chain, and frequent quality controls. So we can vouch for every single product we supply. With a strong focus on challenges in the foodservice industry, we are constantly looking for new and innovative products.

ABENA is your responsible and professional partner – also when it comes to sustainability. We offer products that can help take steps towards many different sustainability goals and are happy to advise you on the best match for your CSR strategy.

We work with Life Cycle Assessments and a variety of eco-labels. Our goal is to have 70% eco-labeled products by 2030!

With ABENA, you are not just buying a product – you get access to a world of dedicated product specialists with many years of expertise, more than 38,000 high-quality products, all documentation needed, and much more. ABENA's one-stop-shop makes it easy to purchase everything you need in one place, ensuring consistent quality in all your locations.

Products you can trust

At ABENA, we can help you find the right products and solutions for your specific needs. We offer a wide assortment of foodservice products for professional kitchens, catering companies, retail, and restaurants.

Material guide

The material guide below is made as a general guideline for the use of our products.

The applicable/recommended temperature for each product may deviate from this guide. Please contact your local ABENA Sales Representative for info about specific articles.

All our articles, included in the Gastro, Cater-Line or ABENA brand are clearly labelled with the application temperature, indicated with the thermometer pictogram.

	Polystyrene	Polypropylene	Aluminum	C-PET	A-PET/PET	PVC film 8/12 my
					 	
Application						
Applicable temperature 	-20° - +100	-30° - +130°	-30° - +350°	-30° - +220°	-30° - +70°	-20° - +100°
Recommended temperature 	-10° - +90°	-20° - +100°	-20° - +350°	-30° - +220°	-20° - +70°	-20° - +70°
Limitations	PS may break in low-temperature freezers. The material may change form when heated to more than 90°C.		Non-coated aluminum is not suitable for heavily acidic or salty foods. For food stored for more than 24 hours, the applicable temperature should be below 5°C.	Not suitable for heavily acidic or salty foods. For food stored for more than 24 hours, the applicable temperature should be below 5°C.		Not suitable for pure fats, oils, and food stored in oil.
Exhaust from combustion	CO ₂ , water, and soot	CO ₂ , water, and soot	CO ₂ and aluminum oxide	CO ₂ , water, and soot	CO ₂ , water, and soot	CO ₂ , water, soot, and hydrochloric acid

	Special PVC film	LDPE film	Cardboard/paper	PLA	Bagasse	
		 		 		
Application						
Applicable temperature 	-20° - +150°	-30° - +70°	-30° - +220°	-20° - +40°	-30° - +100°	
Recommended temperature 	-20° - +121°	-20° - +70°	-30° - +220°	0° - +40°	0° - +80°	
Limitations	Not suitable for pure fats, oils, and food stored in oil.	Not suitable for pure fats, oils, and food stored in oil.	LDPE coating in cups for hot drinks is approved for use at 100° for 15 minutes (hot-fill).	Baking paper is flammable and should not touch the sides or heating element of the oven. Paper cups, among other packaging solutions, may contain LDPE / PLA coating.		
Exhaust from combustion	CO ₂ , water, soot, and hydrochloric acid	CO ₂ , water, soot, and hydrochloric acid	CO ₂ , water, and soot	CO ₂ , water, and soot	CO ₂ , water and soot. Fjern Biodegradable	

Material guide

Find the perfect match

Choose the right foodservice product for the need.

Our material guide provides the general instructions for the use of our products. The guide shows the applicable and recommended temperatures of the product and will also indicate if the product has any limitations. This way it can easily be determined whether the desired product lives up to the need.

For example, a C-PET tray allows for both freezing and reheating the food at temperatures between -30 °C and 200 °C.

C-PET is not suitable for heavily acidic or salty foods.

Customized cups

Do you want to create more attention around your brand?
With a custom printing solution, you can easily get your
brand in the hands of your customers.

Drinks

Cups, plastic glasses, and more

Our assortment of cups and glasses includes everything from to-go to reusable solutions.

ABENA offers the market's widest assortment of disposable and reusable cups and glasses in a variety of sizes, qualities and materials. We carry, for instance, many FSC™-certified coffee cups with the Nordic Swan Ecolabel supporting our climate target of reaching 70% eco-labeled products by 2030.

Biodegradable or compostable?

Several of our cups and glasses are either biodegradable or compostable.

Choose the product that best suits your strategy - read on to get a short explanation of the difference between the two.

Compostable materials can decompose in an industrial composting facility. These products adhere to the European Standard EN 13432, requiring a composting time of 90-180 days. The products may also not leave any toxic residues.

Biodegradable material can decompose fully without any specific treatment. The product is of 100% natural origin without harmful chemicals or additives. When decomposed, they turn into water, carbon dioxide, and biomass without leaving anything else behind.

Products with the Nordic Swan Ecolabel meet stringent environmental requirements with regard to raw material, production, use, documentation and safety

FSC™ (Forest Stewardship Council) is an international non-governmental organization dedicated to the promotion of responsible forest management worldwide. FSC™-certified products are made from raw materials from well-managed forests and responsible sources. The label's traceability and integrity are upheld through stringent control measures, and by choosing FSC™-certified products, you help take care of forests and the people and wildlife that call them home. For more information, go to www.fsc.org.

Cups to go

Serve customers with a stylish and hygienic cup for hot or cold beverages.

Our assortment of solutions for hot drinks has a great variety of materials and sizes. We provide cups with a design to match any kind of business - from low-key to classic or rugged. Choose between single or double walled cups to suit any customer's preference.

ABENA's product range for cold and hot drinks is built on solutions that are either disposable, biodegradable, compostable or even 100% plastic free - to fit your specific requirements for environmental impact.

Your professional partner in sustainability

ABENA is your responsible and professional partner – also when it comes to sustainability. We have many years of experience within the field and together, we will find the right solutions that suit your needs. We help you set concrete goals for how you and your company can become more sustainable by collaborating with ABENA.

ABENA Sustainable Development Goals 2030

We want to minimize our energy consumption, reduce CO₂ emissions, and change to renewable energy sources across our production and office facilities.

We want to increase our workforce and secure safe and equal working conditions for our and our suppliers' employees.

We want to minimize our environmental impact and limit waste through a circular economy approach.

We want to preserve the variety of life on Earth and prevent the loss of extinction due to human activities.

Life Cycle Assessments

We use life cycle assessments (LCA's) to make it possible for our customers to choose the products that fit their sustainability vision and make a measurable change with their ABENA selections.

With the LCA's we can calculate our products' impact across 16 different environmental factors, including climate change, water use, and depletion of natural resources.

See how much
**CO₂ can
be saved**
by choosing an
alternative for
the PS cup

0%

The PS cup forms
the basis for our
CO₂ comparison

18%

PS cup with
calcium

The calculations are based on 1000 cups (7.5 oz) and incineration. The modelling and calculation methods are done based on ISO 14040/44. The impact categories and result reporting are done in accordance with EF 3.0 (PEF - Product Environmental Footprint.)

We assess our products' entire life cycle from production to use and disposal or recycling. The assessment is based on different combinations of raw materials, packaging solutions, transportation methods, and end-of-life handling, when designing and developing products.

Did you know?

ABENA offers a wide assortment of plates and trays. With our many designs, qualities and materials, we can find the perfect solution for your needs.

Serving food - plates, cutlery, trays, and more

Present your food in the best way with our many solutions for a variety of dining experiences.

ABENA can help you find products of the quality you need with all the required documentation.

Our assortment includes knives, forks, napkins, and individually packed cutlery. All cutlery sets are FSC®-certified, some covered in a thin layer of natural wax to elevate the dining experience for your customers.

Do you prefer reusable solutions?

We also offer washable solutions and qualities from the highest EU testing standards in everything from straws over cutlery to plates in durable 100% polypropylene. In fact, our products can go in industrial dishwashers up to 125 times. These solutions should be sorted as plastic waste to be recycled.

Plates, trays and cups

The ABENA assortment offers plates, trays and cups for any occasion.

The selection covers both disposable and reusable solutions from biodegradable paper plates to compostable fiber plates and PP-plates.

Fiber plates and bowls are made from sugar cane - a 100% compostable material. The texture of the material makes the product rigid, which makes the plates stable.

Our reusable plates are made of PP in a quality that is safe for both microwave and dishwasher.

Evolve is an exciting and innovative range of trays and containers developed for industrial kitchens, restaurants and the catering industry. Made of recycled post consumer PET. That also means the products change appearance throughout the year, depending on the colour that dominates the recycled plastic they are made from. C-PET products are suitable for all kinds of food. They are particularly good for use in the oven, as they can withstand temperatures of up to 220°C. You can either cover the trays with sealing film or use a practical snap-on lid. The latter allows you to stack the trays quickly and securely.

The compartmentalised C-PET tray is the perfect choice for tapas, cheese platters, lunch platters and similar meals including several small dishes. The tray has a lid in 2 heights. Oven and microwave safe and frost-tolerant. Approved for all types of food.

Transport boxes

Safe solutions for food transportation.

Transport your food safely to the customers with securely stacked meal trays to ensure that the high quality lasts from kitchen to table. The ABENA assortment covers boxes for many transportation needs and in many materials - from thermos in EPS and EPP to cardboard and takeaway boxes for transportation of smaller amounts.

Cardboard boxes are available in two different heights. Both models have a width that allows two standard trays to fit besides each other. The low cardboard box can contain 6-8 trays, while the taller model can contain 8-10 trays.

ABENA also offers an assortment of sealing machines and film for easy and efficient sealing of trays. With a sealing machine the contents will be securely packed and hygiene at its best.

Did you know?

We have our own production facility in Denmark where we produce baking paper, aluminum foil, sandwich paper and cling film. Among others, the production is certified by FSC™ and the Nordic Swan Ecolabel.

In the kitchen

Source products for a professional kitchen effortlessly.

Prepare, present and preserve any food with quality products from our wide assortment. Our product range covers every need in the kitchen - from baking tins to cooking bags, baking and sandwich paper as well as a large selection of cling film and foils.

To us, quality is of the essence. Therefore, you will find many of our products have been certified with the Nordic Swan Ecolabel - this goes for our baking and sandwich paper assortment. Some baking and sandwich paper products are also FSC®-certified.

Add a lid to the tray so that the contents are kept hot and the trays can be stacked. The smart snap-on feature makes it easy to fit the lid.

Aluminum trays

Aluminum trays with rolled or angled edge.

In ABENA's assortment you will find both large and smaller aluminum trays with either a rolled or angled edge. Aluminum trays are excellent for conducting heat which makes the trays the ideal choice for preparing food - fx pates or yeast bread.

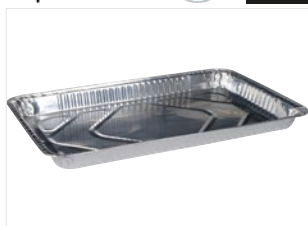

For the aluminum tray with angled edge we also provide a paperboard lid - a great option if labeling is needed.

Food Packaging/Storage

Aluminum Trays

Gastronorm tray

Item number	Dimensions	Features	Thickness	Volume, gross	Material	Pcs per pk / pk per cll
5701	52.5x32.5x4.5cm	Rectangular, 1/1 GN	160 micron	5350 ml	Aluminum	10 / 5
132272	52.5x32.5x5.5cm	Rectangular, 1/1 GN	160 micron	6800 ml	Aluminum	10 / 5
5053	52.5x33x8.5cm	Rectangular, 1/1 GN	170 micron	10250 ml	Aluminum	10 / 5
5694	52.5x33x8.5cm	Rectangular, 1/1 GN	135 micron	10250 ml	Aluminum	10 / 5

1/1 Gastronorm trays are available in several content sizes, and thus meet your various needs for storage, cooking, heating and serving. The roll edge makes it easy to put a lid on the tray and helps stabilize the tray. Aluminum can be used for most foods, and can be used in both conventional ovens and microwaves.

Lid

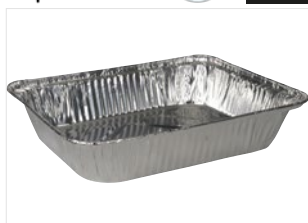

Item number	Dimensions	Features	Thickness	Rim type	Material	Pcs per pk / pk per cll
5695	54x33.5x1.2cm	For 1/1 Gastronorm aluminum pan, item 5053/5694/5701/132272	95 micron	Rolled edge	Aluminum	10 / 5

The aluminum lid is easily clamped around a 1/1 gastronorm tray and protects the contents in the tray and keeps them warm or cool. Aluminum can be used for all foods, and can be used in both conventional ovens and microwaves.

Gastronorm tray

Item number	Dimensions	Features	Thickness	Volume, gross	Material	Pcs per pk / pk per cll
5698	32.6x26.2x6.6cm	Rectangular, 1/2 GN	100 micron	3600 ml	Aluminum	10 / 10

1/2 gastronorm trays meet your various needs for storage, cooking, heating and serving. With the angular edge you can easily clamp a lid on the tray. Aluminum can be used for most foods, and can be used in both conventional ovens and microwaves.

Lid

Item number	Dimensions	Features	Thickness	Rim type	Material	Pcs per pk / pk per cll
5699	25.2x31.3cm	For 1/2 Gastronorm aluminum pan, item 5698	310 g/m2	Vertical rim	Paperboard, aluminum	50 / 10

The lid is easily clamped in place on an Aluminum tray with a vertical rim and protects and keeps the contents hot for a long time. The aluminum trays can then easily be stacked and transported.

Baking Forms and Paper

Baking tin

Item number	Dimensions	Features	Color	Material	Sheet per cll / cll per pll
131839	50.4x33.6x3.5cm, Ø5cm	In sheets, with black border	White	Paper	100 / 12

When speed is of the essence, this smart baking form is ideal! The sheet contains 24 high quality muffin forms. Bake them together or divide the sheet to suit requirements. The black sheet combined with the white forms is attractive, decorative and it is oven and microwave safe. Bon appetit!

Baking paper, ABENA

Item number	Dimensions	Features	Thickness	Color	Material	Roll per cll / cll per pll
1000022247	8m x 38cm	In box	40 g/m2	White	Paper, virgin	24 / 54
134283	20m x 38cm	With cutting rail, in box	40 g/m2	White	Paper, virgin	24 / 54

This Nordic Swan Ecolabeled and FSC-certified baking paper has silicone coating on both sides, which is very effective in preventing the baked goods and food products from sticking. The baking paper is free of fluorine and bleached without elemental chlorine. It can be used in baking, storage, and heating of food and is suitable for use in both ordinary ovens and microwaves.

Baking paper, ABENA Cater-Line

Item number	Dimensions	Features	Thickness	Sub-color	Material	Roll per cll / cll per pll
11156	100m x 42cm	In cut-box	40 g/m2	Bleached	Paper, virgin	3 / 54

This Nordic Swan Ecolabeled Cater-Line baking paper has an extra-thick silicone treatment on both sides, which is very effective in preventing the baked goods and food products from sticking. The roll comes in a cut-box that facilitates handling. The baking paper is free of fluorine and is not bleached with chlorine. It can be used in baking, storage, and heating of food and is suitable for use in both ordinary ovens and microwaves.

This Nordic Swan Ecolabeled Cater-Line baking paper has an extra-thick silicone treatment on both sides, which is very effective in preventing the baked goods and food products from sticking. To facilitate handling, it comes in sheets. The baking paper is free of fluorine and is not bleached with chlorine. It can be used in baking, storage, and heating of food and is suitable for use in both ordinary ovens and microwaves.

Baking paper, ABENA, with holes, ABENA

ABENA

Item number	Dimensions	Features	Thickness	Material	Sheet per pk / pk per cll
11579	42x38cm	With holes for air-circulation, 6 sheets	82 g/m2	Paper, virgin	6 / 11

This patented french fry paper is an extra thick, siliconed fat-absorbing paper with holes for air-circulation. It is very suitable for meal preparation of pre-fried and pre-baked foods, such as french fries, fishsticks or chicken nuggets or bread buns. The holes apply the heat for extra crispy baked goods, without the food needing to be flipped during baking. The paper also effectively absorbs excess fat and moisture.

Crisp paper, Rul-let

Item number	Dimensions	Features	Thickness	Material	Roll per cll / cll per pll
1000020961	42x38cm	8 sheets, in box	82 g/m2	Paper, virgin	24 / 54

This patented crisp paper is made of extra thick, siliconized, oil absorbing paper. The paper is perforated, which creates air circulation. Along with the oil absorbing quality, this makes the food extra crispy, without having to flip it in the oven. It is particularly suitable for the preparation of pre-fried foods, such as french fries fish sticks and chicken nuggets.

Sandwich paper, ABENA

ABENA

Item number	Dimensions	Thickness	Sub-color	Material	Roll per cll / cll per pll
1000020327	25m x 28cm	38 g/m2	Bleached	Paper, virgin	12 / 112

The food wrapping paper is suitable for wrapping of all kinds of food. The paper is also useful for e.g. lining bowls when preparing food in the microwave. It is produced without the use of fluoride and is bleached without elemental chlorine. It is Nordic Ecolabelled and FSC certified.

Cling film, foil and dispensers

An overall solution for sealing trays.

At ABENA we provide a large selection of cling film in both PVC and PE to suit every need for sealing in the industrial kitchen. Likewise, our assortment of aluminum foil will meet any need for food preparation or wrapping of i.e. cold cuts or cheese.

For both cling film and foil we also offer specially designed dispensers for industrial kitchens. The dispenser is equipped with a smart, practical roll cutter, which makes it quick and easy to cut cling film or aluminum foil into the desired lengths. The roll cutter ensures precision cutting without tearing of the wrap or foil.

Cling Film, Foil and Dispensers

Cling film, ABENA Cater-Line

cater.Line ABENA

Item number	Dimensions	Features	Thickness	Color	Material	Roll per cll / cll per pll
134075	300m x 29cm	Unperforated, in cut-box	7 micron	Champagne	PVC	6 / 72
134076	300m x 44cm	Unperforated, in cut-box	7 micron	Purple	PVC	6 / 54

The cut box has a slide cutter that cuts the film by sliding the slide cutter from one side to the other. In addition, the cut box allows you to take the film with you wherever it is to be used - independent of a dispenser. The film can be used to store food and for general household use. However, not pure fat, oil and food stored in fat. PVC film is very stretchable and has very good adhesion. It is therefore often the choice of professional kitchens. PVC is also breathable, thus limiting the development of condensation. This helps cooled food maintain its original consistency. This special film can be used at higher temperatures than PVC film normally can.

Cling film, ABENA Cater-Line

cater.Line ABENA

Item number	Dimensions	Features	Thickness	Color	Material	Roll per cll / cll per pll
15518	250m x 30cm	Unperforated, in cut-box	8 micron	Clear	PVC	3 / 88
15519	250m x 45cm	Unperforated, in cut box	8 micron	Clear	PVC	3 / 66

The cut box has a slide cutter sliding from one side to the other thus cutting the cling film. In addition, the cut box allows you to take the cling film with you wherever it is to be used - with no need for a dispenser. The cling film can be used to store all types of foodstuffs and for general household purposes.

However, avoid using with pure fats, oily and fatty foodstuffs. PVC cling film is very stretchable and has very good adhesion. It is therefore often the choice of professional kitchens. A key feature of PVC is that it is a breathable material limiting condensation.

This helps chilled food maintain its original consistency. This special film can be used at higher temperatures than PVC film normally can.

Cling film, ABENA Cater-Line

cater.Line ABENA

Item number	Dimensions	Features	Thickness	Color	Material	Roll per cll / cll per pll
134073	300m x 29cm	Unperforated	7 micron	Purple	PVC	4 / 162

Label

Manila tag

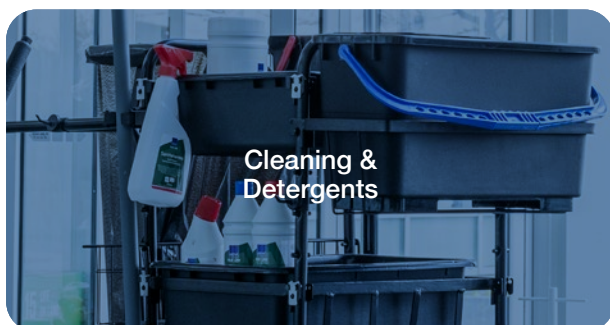

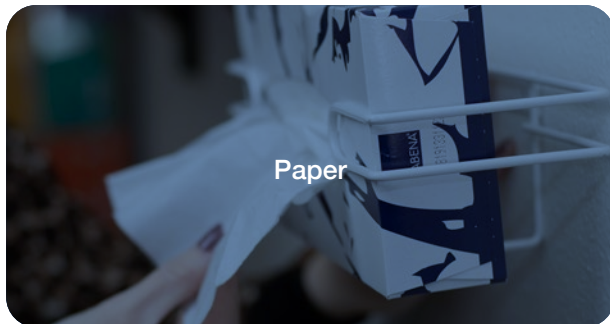

Item number	Dimensions	Color	Material	Pcs per cll
133264	8x4cm	Nature	Paper	1000

Avoid food waste and keep things in order with these handy manila labels for food labelling. Made of strong natural-coloured paper and can be attached to plates, dishes and containers whether plastic or stainless steel. Using these manila labels will help reduce food waste and ensure that the use-by date is not exceeded. They're also great for hygiene and in-house control. They withstand moisture and high ventilation, as well as storage in freezers and cold rooms.
